

Ultra Classic Series

Geothermal Units

- *Self-regulating two stage technology allows the Ultra Classic to operate at the most efficient speed for all weather conditions*
- *Equipped with an Electronic Variable Speed Fan Motor, the Ultra Classic controls system air flow to assure high operating efficiency and superior dehumidification*
- *Top performance, unsurpassed comfort and maximum savings year round*
- *Industry's highest efficiency ratings*
- *Quiet operation*
- *Low maintenance*

CLIMATEMASTER®
Quality Products Built For Life!

Years of Free, Renewable Energy for Home Comfort at a Reasonable Cost

A simple, yet efficient concept. In combination with an underground loop system, ClimateMaster's geothermal units utilize the nearly constant temperature of the earth to heat and cool your home. In winter, fluid circulating in the loop absorbs heat from the Earth. The Ultra Classic unit easily converts this energy into warm air for circulation throughout your home. In summer, the system reverses and returns your indoor heat into the cooler Earth.

Since geothermal systems require only a small amount of electricity to perform this heat exchange with the Earth, you can expect to reduce energy consumption and save money each month on your utility bills. For over forty years, value conscious home owners have enjoyed the advantages of heating, cooling and producing hot water with ClimateMaster geothermal products.

Ultra Classic Geothermal Advantages

Low energy cost: State of the art components make the Ultra Classic our most efficient energy saver.

Reliable: The simple yet durable design of the Ultra Classic ensures long life, dependable operation and low maintenance.

Environmentally Sensitive: Geothermal technology responsibly works with the Earth to create extreme comfort in your home.

Quiet Operation: The Ultra Classic's variable speed fan quietly heats and cools without disturbing your family.

Flexibility: The Ultra Classic can be connected to a water well, a closed loop or a combination of both.

Highest Comfort: Two stage operation adjusts to satisfy changing weather conditions.

Quality: ClimateMaster uses only the highest quality materials and components in every Ultra Classic unit. Each unit is run tested in our factory to ensure optimum performance.

Ultra Classic Warranty: Five year limited warranty (optional ten year available).

Ultra Classic Features

- **Dual Compressors with Independent Refrigerant Circuits:** Highest possible efficiency and reliability designed to handle nearly any weather demands.
- **Extended Range of Operation:** The Ultra Classic unit can be installed in just about any application.
- **Electronic Variable Speed Fan Motor:** Means extremely high comfort, quiet operation and low operating costs.
- **Solid State Protection Controls:** Simple and easy to maintain.
- **Optional Built in Hot Water Generator:** Reduces your hot water costs.
- **Installation and Service Features:** Swivel water connections, internally trapped condensate and multiple access panels.
- **Highest Efficiency Units:** Rated by the Air Conditioning and Refrigeration Institute.
